

StarForth SSM Research Companion

Mathematical Companion, Formal Claims, and Ontology

Companion to: “Steady-State Convergence in an Adaptive Runtime”

SSRN Working Paper, Robert A. James, 2025

Robert A. James

About This Volume

The SSRN working paper “Steady-State Convergence in an Adaptive Runtime” ? is published separately. This companion volume collects material that supports and extends the paper: the full Mathematical Companion (typeset from source), the formal claim table, the ontology of thermodynamic metaphors, and the academic wording guidelines used in the paper’s preparation.

The canonical paper PDF is at:

`docs/working/papers/published/James_Steady-State_Convergence_Adaptive_Runtime.pdf`

Contents

I	Mathematical Companion	1
1	Mathematical Framework	3
II	Formal Claims and Anti-Claims	5
2	Formal Claim Table	7
3	Anti-Claims	9
4	Executive Summary	11
III	Ontology of Terms	13
5	Thermodynamic Metaphor Ontology	15
6	Academic Wording Guidelines	17
A	Scientific Defense Checklist	19
B	Replication Invitation	21

Part I

Mathematical Companion

Chapter 1

Mathematical Framework

Part II

Formal Claims and Anti-Claims

Chapter 2

Formal Claim Table

Chapter 3

Anti-Claims

Chapter 4

Executive Summary

Part III

Ontology of Terms

Chapter 5

Thermodynamic Metaphor Ontology

Chapter 6

Academic Wording Guidelines

Appendix A

Scientific Defense Checklist

Appendix B

Replication Invitation
