

Steady-State Machine — Patent Application
Provisional and Non-Provisional Filings

Robert A. James

Contents

1	USPTO Cover Letter	3
2	Changes Summary	5
3	Jargon Alignment Log	7
A	Filing Materials Inventory	9

About This Volume

The patent application documents are maintained under legal hold in `docs/patent/`. This wrapper provides a single entry point for the formal publication set. The canonical builds are:

```
1 cd docs/patent
2 pdflatex main.tex # non-provisional
3 pdflatex ssm_RAJ_v1_patent_application.tex # v1 application
4 pdflatex ssm_provisional_patent.tex # provisional
```

Produced PDFs:

- `docs/patent/main.pdf` — primary non-provisional application
- `docs/patent/ssm_RAJ_v1_patent_application.pdf` — v1 application
- `docs/patent/ssm_provisional_patent.pdf` — provisional filing
